

Plug-Ins for Application Integrator™

Extend your investment in GXS' Application Integrator. GXS offers a variety of Plug-Ins to help you quickly integrate your systems and meet industry standards.

CIDX Plug-In

The Chemical Industry Data Exchange (CIDX) has defined an XMLbased uniform standard of data exchange specifically for the buying, selling and delivery of chemicals, known as "Chem eStandards". The CIDX Plug-In provides ready to use transactions, as well as a simplified method to establish a relationship with a CIDX compliant trading partner.

COBOL Plug-In

The COBOL Copybook Plug-In provides a quick and easy method for importing a COBOL file description from a copybook directly into the Workbench mapping tool, reducing time, costs, and errors when mapping your business applications.

HIPAA Plug-In

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) requires all US healthcare entities to migrate to the HIPAA standard to send electronic administrative information. GXS offers the HIPAA Plug-In, a simple solution to enable your business to comply with HIPAA mandates, enabling you to share electronic documents with trading partners, as well as integrate and streamline the flow these documents across internal systems.

ODBC Plug-In

Directly retrieve and update business information across your enterprise databases using the ODBC Plug-In. This Plug-In facilitates high-speed, standard SQL-based access directly from the data transformation engine with your ODBC compliant databases, enabling your business to access information stored across your entire enterprise.

Rosetta Net Plug-In

The RosettaNet organization has defined an XML based standard to automate the high tech industry supply chain. The RosettaNet Plug-In simplifies the process of integrating of RosettaNet trading partners into your supply chain with ready to use transactions and Partner Interface Process (PIP) message mapping.

SEF Plug-In

Save time and improve accuracy when implementing an EDI document with your trading partners. Many trading partners use 3rd party software products to specify their EDI document in a format called Standard Exchange Format (SEF). Using the SEF Plug-In allows you to quickly and easily import your trading partners' EDI document into the Workbench mapping tool, saving time in the mapping of EDI documents to or from your business applications.

Extend your investment to save time, money, and enable trading partner relationships. GXS offers your organization a wide variety of Plug-In solutions to help you quickly meet industry standards and increase efficiencies in trading partner relationships.

APPLICATION INTEGRATOR™

The world's leading data-transformation, mapping, translation and management system makes implementing your company's B2B and A2A programs faster and easier.

XCBL Plug-In

CommerceOne® has defined an XML-based transaction called xCBL. GXS's xCBL Plug-In provides the ready to use transactions, as well as a quick and easy way of establishing trading partner relationships using xCBL transactions.

I18N Plug-In

The I18N (Internationalization) Plug-In opens the door to true global transactions by accommodating data in double or multi-byte character sets for local language versatility, providing device transparency, and enabling quick and easy implementation of e-commerce programs with your international business partners with the full functionality users have come to expect.

XML Plug-In

Our XML Plug-In enables clients to integrate or generate XML transactions to and from their back-end applications. This Plug-In provides a quick method for importing an XML Document Type Definition (DTD) into the Workbench mapping tool for easy and accurate mapping. Furthermore, it allows the user to validate the incoming XML transaction against its DTD, thereby preventing non-compliant transactions from proceeding into your back-end business applications.

XML Schema Plug-In

The XML Schema Plug-In builds upon the XML Plug-In to further extend Application Integrator's support for XML Schema Definition (XSD). The XML Schema Plug-In provides a quick method for importing an XSD schema into the mapping tool. It also allows the user to validate the incoming XML transactions against its XSD schema.

Application Integrator

GXS's Application Integrator is a powerful, intuitive software solution that improves productivity by offering any-to-any mapping, data translation, platform independence and rapid implementation. Application Integrator is an easy to use, flexible system that enables your company to accomplish XML, EDI and any-to-any data transformation and quickly set-up trading and other business partners to participate in today's e-commerce marketplace.
